Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 11 claims.

Information Disclosure Statement

Receipt is acknowledged of Information Disclosure Statement, which has been reviewed by the Examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent 4-44581 (Japanese Patent) in view of Basicckes et al. (Pat No 6,152,412).

The Japanese Patent discloses a holder comprising a base (3), attaching means (6), curved wall defining a space, and having a finger (1) extending from the top of the wall, and antivibration material (13) on said space.

The patent to Basicckes et al. discloses another holder having ribs 2 to increase gripping.

Art Unit: 3632

It would have been obvious to one skilled in the art at the time the invention was made to have provided the holder shown by the Japanese Patent with rib means as shown by Basicckes et al. to increase the gripping. How the antivibration material is applied is considered to be an obvious matter of engineering choice with no patentable significance to a product per se.

Allowable Subject Matter

Claims 6-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morehouse (2,355,742), Robertson (2,404,531), Enlund et al. (3,606,218), Saito (5,184,794), Giangrasso (6,126,119), Bauer (2004/0188570 A1) and Shibuya (2004/0217236 A1) show examples of interest. Morehouse , Robertson and Shibuya show antivibration material. The others show rib means.
